Employer: Wiley Electronics
Location: Saugerties, NY
Position: Mechanical Engineer
Job Status: Full Time
Travel: Less than 15%

About Us:

Wiley Electronics LLC designs and manufactures balance of system components for photovoltaic applications. We are dedicated to developing and providing innovative, high-quality solutions that are revolutionizing the solar industry. This position is an exciting opportunity to work for a technologically advanced, leading company in a rapidly expanding industry.

Position Details:

The ideal candidate will possess an innovative mind, have a strong work ethic, attention to detail, and great time management skills. In addition, he or she must work well in a team oriented environment and be adaptable within a dynamic atmosphere.

Primary responsibilities may include:

- Working closely with customers to create designs, prototypes, and parts based on their requirements and specifications.
- Creating detailed installation instructions for customized photovoltaic components using SolidWorks.
- Conducting and documenting validation testing to ensure that all parts exceed industry standards.
- Working with multiple departments to meet deadlines and deliver results.

Primary skills required:

- Thorough knowledge of SolidWorks
- Excellent written and verbal communication skills and analytical skills
- The ability to drive multiple projects simultaneously
- Relevant experience in the solar and/or photovoltaic industry is preferred

Please email Aiyana Berman-Waner: aiyana@we-llc.com with your resume and cover letter in PDF format. Please no phone calls.

- Include a technical writing sample and project profile.
